

Application Sponge

page 1 of 1

Set consisting of two application sponges with suede cover. For optimal handling in different application areas, the set includes sponges in two different sizes (80x35x35mm, 80x80x35mm). The protective barrier between the foam core and the suede cover prevents the sealant from penetrating the foam core, so less material is needed. The high-quality, full-surface microfiber cover conforms ideally to contours due to the soft foam core. This enables quick and easy application.

Areas of use

Application of ceramic and glass coatings on the exterior of vehicles

Recommendations for use

Apply the coating to the Application Sponge and follow the application instructions.
