

Cyclone AZ2000

Turbo cleaning gun is an innovative cleaning tool that chooses powerful turbine technology as the motor mechanism to create the tornado effect. Its rotation speed can reach a maximum of 8,000 revolutions per minute. In addition, the air hopper is adjustable to control the rotation speed of the rotation set. Different cleaning results are achieved by adjusting the rotation speed. To significantly extend the life cycle of the rotation set, it is designed with rolling bearings so that there are no contact points between the outer metal spray tube and the air hopper. As a result, the air hopper cannot break or be damaged when the rotation set rotates.

Rotation speed adjustable 1000 to 8,000 rpm. Powerful rotation method by turbo motor with roller bearings. Strong and sturdy mechanical design. Creative and controllable method of rotation speed.

Multifunctional system: cleaning wet or dry possible to remove dust or dirt from surfaces. Engine compartment, wheels, carpets, dashboards, plastics, upholstery. Easy cleaning of the nozzle and rotation set.

Technical data

Compressed air: 5.0 to 7.0 bar

Recommended compressed air: 6.2 Bar

Rotating speed range: 1.000 to 8.000 rpm

Air consumption: 98 liter/min (6.2 Bar)

Fluid consumption: 0 - 160 cc/min (6.2 Bar)

Particle diameter: 1 to 5 μ

Liquid capacity: 1 L

Cleaner: Neutral, miscible with water
